

ORAL ENDOTRACHEAL TUBE TAPING

Step 1. Clean the mouth, place ETT in left corner of mouth and hold firmly

Step 2. Apply Benzoin tincture to all areas to be covered with Elastoplast firmly

Step 3. Place first tape at the corner of the mouth **on the same side** as the ETT

Step 4. Place the top leg under the nose but avoid the lip. Bring the lower leg tight around the ETT

Step 5. After two anchoring turns, wind the tape up the ETT by 1-3cm

Step 6. Place the second tape at the corner of the mouth opposite the ETT

Step 7. Place the lower leg under the lower lip. Bring the top leg over the upper lip, down and around the ETT

Step 8. After 2 anchoring turns, wind up the ETT and leave a small turn in the tape to allow easy release
